

SCD Equine Plus

USAGE GUIDE

What is SCD Equine Plus?

SCD Equine Plus is an all-natural, probiotic feed and water additive for horses. SCD Equine Plus improves the underlying microbial ecology of horses to one that is balanced and healthy. SCD Equine Plus helps protect your horse or foal against gastric and nervous disorders, colic, diarrhea and scouring disease and stress. This probiotics supplement is designed to help your horse through tough transitional periods and enhance its daily health.

When undigested starch and sugars reach the hindgut, the microbial fermentation process produces a higher level of lactic acid. Excessive production of lactic acid can cause lesions or ulcers in the hindgut which may lead to laminitis. Probiotics have been found to stabilize the digestive system, reducing the risk of colitis and laminitis. Rich with 12 different probiotic species, this blend of beneficial microorganisms may help promote a balanced gut flora and healthy hindgut function, contributing to better overall health.

With consistent usage, SCD Equine Plus may help to improve your animal's digestion, and may control the re-emergence of disease-causing bacteria.

SCD Equine Plus is manufactured in Australia by OzProbiotics Pty Ltd using SCD Probiotics Technology and the principles of beneficial microorganism applied science. It is produced through a natural fermentation process, is not chemically synthesized or genetically engineered or modified, and is certified as an allowed input by Southern Cross Certified.

SCD Equine Plus is a concentrate and should be used as directed although dosage may vary depending on water quality, environment, animal size, sex, lactation status, or weather etc. Use these guides as a starting point and be prepared to experiment (more or less) for the optimal result for your animals.

Simply pour over feed, drinking water, hay, chaff or administer orally with a syringe daily with feed. For horses with poor appetite, administer orally with a syringe for the first 3 days, then pour over feed. There is no withholding period with SCD Probiotics Equine Plus.

SCD Equine Plus

Equine Feeding Guide

Horse Type	Growth Stage	Horse Weight (Est. Kg)	Equine Plus (ml)	How to Apply
Pregnant Mare	Last 3 Months	550	10ml/head/day	Add to drinking water or spray on feed
