

SCD Odor Away

USAGE GUIDE

What is SCD Odor Away?

SCD Odor Away is an all-natural, biological odour reducer containing powerful microbes and their metabolites that inhibit unpleasant odours commonly found in industrial, livestock, composting, waste treatment facilities or household environments. SCD Odor Away is made using SCD Probiotics Technology and the principles of beneficial microorganism applied science. It is a live probiotic product and reduces odours through microbial digestion of ammonia, hydrogen sulphite, and other toxic volatile organic compounds. SCD Odor Away is listed for use in organic production by the Organic Materials Review Institute (OMRI) and is certified as an Allowed Input by Southern Cross Certified (SXC).

SCD Odor Away is a concentrate and should be used as directed. Test on light fabrics in a discrete location prior to application.

For household applications, use a spray bottle and dilute according to instructions below. Tightly close the cap on the original SCD Odor Away bottle (to help maintain the efficacy of the probiotics inside). Use the diluted amount in the spray bottle within 3-4 days for maximum effectiveness.

SCD Odor Away

Industrial, Commercial and Livestock Applications

For Odours associated with:	Dilution Ratio Product: Water	How to Use
Food Compost	1:100	Spray in first and last week of pile or every two weeks as needed. Moisture should not exceed 30%. Turn frequently.
Yard Compost	1:100	Saturate compost with dilution. Do not turn. Cover for best results. Apply monthly.
Latrine/Solid Waste	1:50	Add weekly, monthly or as needed. For best results, keep covered.
Poultry Pens	1:100	Spray once per week or as needed.
Livestock and Stable Operations	1:500	Spray once per week or as needed.
Pet Odour	1:100	Spray dilution over affected area. Note: for application on light coloured fabrics, test for colour.
Waste Water/Drainage Solutions	1:100	Spray over top or introduce at various points around lagoon periphery and centre. Apply monthly or as needed.
Rubbish Bins	1:500	Spray inside of bin or wipe out with damp rag. Mist surrounding area as needed.
Carpets and Floor Mats	1:20	Spray onto cleaned mat or carpet until slightly damp to touch. Let dry. Reapply as necessary.

SCD Odor Away

Industrial, Commercial and Livestock Applications

For Odours associated with:	Dilution Ratio Product: Water	How to Use
Smoke Fumes	1:10	Spray dilution over affected area. Note: for application on light coloured fabrics, test for colour.
Shoes and Sports Gear	1:50	Spray onto shoes/sports gear, then let dry. Re-apply as necessary. Note: for application on light coloured fabrics, test for colour. For best results, clean item with non-antibacterial organic soap.
