

# Stable Klean

## USAGE GUIDE

### What is Stable Klean?

**Stable Klean** works as an effective cleaning agent and reduces general odours associated with stables and barns. It can also be sprayed directly on manure to help mitigate odour and accelerate decomposition. **Stable Klean** is chemical free, non-toxic and biodegradable. Used regularly it reduces recurring problems with flies and other shed and stable insects.

**Stable Klean** contains millions of beneficial microorganisms – known as probiotics – that work as effective cleaning agents to control pathogens that may be harmful to horses and other farmyard animals. When sprayed directly on manure, it mitigates odour and accelerates decomposition. In addition, **Stable Klean** is effective in reducing recurring problems with flies and other pests commonly found in and around the stable.

**Stable Klean** is manufactured in Australia by OzProbiotics Pty Ltd using SCD Probiotics Technology and the principles of beneficial microorganism applied science. It is produced through a natural fermentation process, is not chemically synthesized or genetically engineered or modified, and is certified as an allowed input by Southern Cross Certified (SXC).

Fourteen different species of microorganisms (probiotics) are blended together for maximum effectiveness.

# Stable Klean

## Usage Guide

Applicaition	Dilution Ratio	Dilution Example	How to Apply
<b>Stable Cleaning</b>	Dilution of Product to Water 1:50	e.g. 200ml/10L	A backpack sprayer or other easily portable hand sprayer is required. Spray <b>Stable Klean</b> on all surfaces (floors, walls, ceiling). Spray twice per week or more often. For best results, include the bedding area and manure inside the stable.
<b>Manure Treatment</b>	Dilution of Product to Water 1:100	e.g. 10ml/10L	After you have moved the manure from the stables to outside (a protected place away from moisture is best), spray the manure pile. Spray top of manure each time you add to the pile, or create a new pile.  After several weeks, you should be able to pull from the bottom of the pile and use the composted manure in your paddock or garden.

## Storage

Store at room temperature and DO NOT REFRIGERATE.

Always keep the lid tightly on and away from direct sunlight.

**Stable Klean** is produced through a natural fermentation process and is not chemically synthesized, genetically engineered or modified (Non-GMO).

This product may cause sedimentation but that will not impact the product's effectiveness.

Shelf life of 3 years, however best to use within 6 months of opening.

Safe for people, pets, plants and the planet.
